

CAPABILITY STATEMENT

David Pike, VP Exhaust Group
Ph: 715.225.8087
dpike@catalyticcombustion.com

Core Competencies

Catalytic Combustion is an extremely diverse Emissions Solution company offering a broad range of Emission Solutions to include:

Muffler/Silencer Exhaust Systems • Catalyst products for majority of applications
Insulation • Catalytic/Thermal/Regenerative Oxidizers • VOC control
Air Corrections • Laser/Press Brake • Catalyst Housings

Past Performance

- Federal Government (Department of Defense - Navy)
- State Government (State of Washington)
- Local Governments, municipalities (CA, NJ, IA)
- Numerous private sector customers to include: Taylor Power Systems based in Clinton, Mississippi that we provide exhaust solutions from stainless mufflers to catalyst housings for their generator needs.

Differentiators

- Wisconsin based manufacturing
- Coating technologies developed in-house
- Rapid design and prototyping
- Testing capabilities
- Prompt customer service with actual answers
- Service support available

Pertinent Codes:

DUNS: 130633944 • Cage: 4SST5 • NAICS Codes: 336390, 333413, 332510, 336310, 332996, 333514

Catalytic Combustion was founded in 1950 and developed the first ever U.S. patented catalyst to destroy volatile organic compounds (VOCs). Privately owned by a descendant of company founders with Wisconsin based manufacturing. Corporate headquarters and manufacturing located in Bloomer, Wisconsin with field offices throughout the U.S.
