

Northern Wings

Brief Description of Organization:

We are an AS9100 certified aerospace manufacturer and stocking distributor. We provide certified materials and parts for commercial and military aircraft programs serving customers such as NASA, Boeing Aerospace, DLA, L-3 Technologies, Sierra Nevada Corporation, the U.S Park Service, the Department of Homeland Security and others.

Northern Wings are procurement item specialists for other public and private sector clientele. Currently we have nearly 8000 vendors in our database.

In addition to those services, we provide construction and environmental services to public and private sector clientele. Agency clients include (but are not limited to), the National Park Service, Coast Guard, and US Army Corps of Engineers. Part of our success comes from the synergy of teaming. We know we can't do it all alone and rely on project partners.

Website: www.northernwings.com

Describe the qualities you look for in a supplier:

Answer the phone!

Respond to email!

Provide data when you said you will.

Provide a description of products and services available in a user friendly, straight-forward web site albeit a capabilities statement.

Make sure personnel whom answer the phone or email have complete knowledge of your product line and availability.

Thorough knowledge of shipping opportunities and limitations. Know the quirks!

If you don't know something, then say so. It's ok! Let's figure it out together.

We are straight-shooters and we look for the same.

List products/services your organization is looking to purchase in the near future:

Because the service sector we work in is so diverse, we can't really define what we are or are not looking for at any specific time. We ask that prospective vendors whom are associated with aerospace, defense, commercial and military aircraft programs to contact us directly at the Newberry facility via email at cburger@northernwings.com, or phone us – (906) 477-6176, ext. 111.

Our construction branch is constantly looking to team with other professionals. We focus on construction projects that can involve environmentally sensitive areas; cultural history; and similar. Our work includes maritime and terrestrial site settings. If you are a vendor or potential customer, please contact our construction services manager at bschwenke@northernwings.com; or by phone (906) 477-6176, ext. 207. Your call will be returned!
