Brief Description of Organization:

As a leading global medical technology and life sciences company, we provide a broad portfolio of products, solutions and services used in the diagnosis, treatment and monitoring of patients and in the development and manufacture of biopharmaceuticals. We help improve outcomes for healthcare providers and for therapy innovators around the world. This means increased capacity, improved productivity and better patient outcomes. We also aim to support our customers in the pursuit of precision health: health care that is integrated, highly personalized to each patient's needs and that reduces waste and inefficiency. We embrace a culture of respect, transparency, integrity and diversity.

Describe the qualities you look for in a supplier:

- ISO 9001 Certification
- In house production engineering staff (Mechanical/Electrical)
- Demonstrated Project Management Skills
- Able to meet GE Healthcare quality requirements
- Sound Financial Health rating
- Corrective Action Preventative Action (CAPA) capabilities
- Purchasing controls
- Engineering / Program Management Support
