

Mike Moeller, President

Remy Batter Co., Inc.

Mike Moeller, a graduate of the University of Wisconsin-Whitewater's College of Business & Economics, is a third generation battery specialist who started his career in the battery industry with Johnson Controls, Inc. In 1992 Mike was called to the family business, Remy Battery Co., Inc., and today has a shared ownership in the company and is also President for Remy Battery.

Mike has also served for over 20 years as Secretary/Treasurer for Battery Electrical Specialists Association (BESA), a non-profit organization comprised of a select group of experienced battery specialists located across North America. Since 1931 Remy Battery has specialized in all types of batteries, battery accessories and battery cables where Mike has overseen the Company's growth into new markets and regions including early entry into ecommerce and an increased regional warehouse distribution network.

Mike is also a patent holder for an innovative packaging solution for dry charged batteries with packaged electrolyte. This packaging solution is integral in adding shipping efficiencies as well as user safety when shipping and activating dry charged batteries packaged with electrolyte. A contract with the Defense Logistics Agency utilizing this packaging solution was recently awarded to Remy Battery and has also been recognized by the battery industry as an Innovation Award finalist by Battery Council International (BCI) in 2017.

In his spare time Mike, along with his wife, run a business that invests in real estate for the short term, vacation rental market and also, when called upon, finds time to advise, guide and mentor his two grown children.
